

BODY/FACE CONTOURING

Liposonic Ultrasound (HIFU)

Skin Tightening • Firming • Reduction

from **R1 200.00**
per area

Hifu stands for high intensity focused ultrasound, a non-surgical treatment that has clinically proven technology for lifting and tightening loose skin. Liposonic ultrasound treatments, also known as ultra therapy use ultrasound to target the deep structural layers of the skin. This stimulates the body's natural healing response and kick starts the formation of new collagen and elastin. It can do most parts of the body, including face and neck

Cryotech – Fat Freezing

Fat Reduction

R1 500.00

Cryo Therapy is the latest in freezing technology used in fat removal treatments through a system of controlled cooling. Vacuum suction cups freeze the fat allowing the fat to crystallize. These fat cells then get released into the lymphatic system. This procedure is pain free and non-invasive.

Radio Frequency + Cavitation

Fat Reduction • Skin Tightening

R 595.00

Ultra sound technology is used to target and tighten loose skin, while the radio frequency targets the fat cells. This treatment is ideal for fat reduction. The treatment is a comfortable process and only, warm tingling sensation might be felt. There are no side effects.

Presso Therapy

Detoxing (Lymph Drainage) • Relaxing • Cellulite Reduction

R 495.00

This treatment reduces water retention and helps the body remove toxins and waste products by boosting both blood circulation and lymphatic drainage.

V8 Body Contouring

Body Shaping • Skin Tightening

R 495.00

Is a non-invasive body contouring procedure that makes use of vacuum suction and radio frequency to effectively break down fatty tissue. It increases lymphatic drainage, promote metabolism and reduces the size of the actual fat chamber, thereby improving body shaping effect. No downtime and comfortable.

LED Light Therapy

Collagen booster, fast healing

R 395.00

LED light therapy is an effective treatment for ageing skin, sun damaged, rosacea, flushing, scars, acne and more. It make use of the red and blue light which helps improve collagen and elsatin. Also helps improve acne. No down time and it can be combined with any facial to boost the treatment.
