BODY/FACE CONTOURING

More information on website

Liposonic Ultrasound (HIFU)

Skin Tightening • Firming • Reduction

from **R1800.00**
per area

Buy 2 for **R 1200.00** (R 600)

Hifu stands for high intensity focused ultrasound, a non-surgical treatment that has clinically proven technology for lifting and tightening loose skin. Liposonic ultrasound treatments, also known as ultra therapy use ultrasound to target the deep structural layers of the skin. This stimulates the body's natural healing response and kick starts the formation of new collagen and elastin.

It can do most parts of the body, including face and neck.

Cryotech – Fat Freezing

Fat Reduction

R 1800.00

Cryo Therapy is the latest in freezing technology used in fat removal treatments through a system of controlled cooling. Vacuum suction cups freeze the fat allowing the fat to crystallize. These fat cells then get released into the lymphatic system. This procedure is pain free and non-invasive.

V8 Body Contouring

Body Shaping • Skin Tightening

R 650.00

Buy 2 for **R999.00** (R 499)

Buy 3 for **R 1200.00** (R 400)

Is a non-invasive body contouring procedure that makes use of vacuum suction and radio frequency to effectively break down fatty tissue. It increases lymphatic drainage, promote metabolism and reduces the size of the actual fat chamber, thereby improving body shaping effect. No downtime and comfortable.
